

SOS Triangle Model

- 1 Leadership
- 2 Strategic Planning
- 3 Customers and Markets
- 4 Management Systems
- 5 Human Resources
- 6 Process Management
- 7 Results

Here is how the 7 Baldrige Criteria align with the triangle model developed by StatOrg Services, LLC. The 3 areas where SOS specializes are in the areas of strategic planning, management systems, and process management to assist companies in their efforts to improve performance and achieve their goals. We work closely with leadership to develop systems and improvements that can allow them to achieve their desired results. In fact, we believe our approach actually creates an opportunity for fusion to achieve even greater results than anticipated.
